

AL01V

The AL01 is perfectly suited for temporary or permanent installations and provides an immediate warning or informational service in a wide range of applications.

Powered by two C - cell 1.5 volt batteries the AL01 Security voice unit is designed to provide an audio warning announcement for security, safety and informational applications. The unit can deliver either a single 20 second message or either one of two 10 second messages upon activation. You can record you own message, utilise the message supplied with the unit or order the unit with any of our library messages detailed on our web site. Installation is simple and suitable for DIY if preferred.

Applications

The AL01 provides an immediate deterrent to potential intruders or trespassers. Common applications include

- Protecting garden furniture and sheds
- Monitor access along pathways, fences, the sides of building
- Monitoring access to motor vehicles
- Monitoring roofs and balconies
- Monitoring empty rooms (Portable application)
- Monitoring children's activity at night (Sleep walking)

The AL01 can provide a warning against potential hazards

- Warning - Dangerous environment (Fork lift trucks, Dangerous chemicals etc)
- Mobile phones are prohibited
- Restricted access areas

The AL01 provides assistance, directions and welcome messages

- Welcome to our shop/for more information on these item please ask an assistant
- These doors are for emergency exit only/parking in this area is restricted
- These premises are now closed for service please call 1234

The AL01 forms part of the external home security range of devices manufactured by Optex. External home security is designed to detect and deter intruders before they enter your home. For more information ask for the external home security leaflet.

The AL01 detector has a typical range of 3-4 m when located at the recommended height of 1.2m and can be rotated on its bracket to accommodate easy detection alignment. Typical battery life based on 20 activations per day is up to 2 years.

Note - Batteries are not supplied with the unit

External detection helps complete the prevention process
