IFSEC 2009 SECURITY INDUSTRY AWARD WINNER REDFSCAN RLS-3060

REDFSCAN RLS-3060, the innovative laser scan detector designed by Optex has won the Intruder Alarm Product of the Year at IFSEC 2009. Sponsored by TAB Systems, the Intruder Alarm Product of the Year was presented to Geoff Pye, Director and General Manager of Optex, by John Sergeant at the IFSEC 2009 Security Industry Awards ceremony on May 10.

The IFSEC Security Industry Awards, organized by United Business Media and the British Security Industry Association, serve to promote the highest standards of excellent in security.

Underlining the importance of innovation and quality in the industry, they honour the best new technology and products that have been introduced to the security industry over the past years. Judging was carried out by a panel of key representatives from the security industry.

Optex is delighted that their R&D commitment in producing this next generation laser detector has been acknowledged so highly by the judges.
